Committee on ways and means-Messrs, Dingley, of Maine, chairman; Payne, of New York; Daizeil, of Penn-sylvania; Hopkins, of Dlinois; Grosvenor, of Ohio; Dolliver, of Iowa; Steele, of Indiana; Johnson, of North Dakota; Evans, of Kentucky; Tawney. of Minnesota, Republicans, and Messrs. Bailey, of Texas; McMillan, of Tennessee; Wheeler, of Alabama; McLaurin, of South Carolina; Roberts, of Louis lana; Swanson, of Virginia, Democrats.

Permission was given to the committee on ways and means to sit during the sessions of the house, and to have all necessary printing done; and then Thursday next.

Chairman Dingley's Synopsis of Important Changes to Be Made.

Washington, March 15,-The date when the new tariff bill is to go into effect is named in the preliminary drafts submitted to the house today as

At quite a late hour in the session of the house Chairman Dingley presented for reference to the committee on ways and means, of which it was well understood he was again to be chairman, the bill upon which he and his Republican associates have been engaged for

Most of the essential details of the bill, except its administrative features. have already been made known in these despatches. But in discussing the general scope and purport of the bill to a representative of the United Associated Presses today, Chairman Dingley gave an interesting synopsis of what he expected of it as follows:

TO RAISE REVENUE.

The bill has two purposes, namely, to raise additional revenue and to encourage the industries of the United States. on the basis of the importations of the hest fiscal year, the bill would increase the revenue about \$112,000,000, divided ng the several schedules roughly as

(a) Chembrais, \$2,500,000; (b) crocker; and glassware, \$4,000,000; (c) metals, \$4,000, (d) wood, \$1,750,000; (e) sugar, \$21,770. 000; (f) tobacco, \$7,000,000; (g) agricultural, \$0,300,000; (h) fluriors, \$1,800,000; (f) oution, \$1,700,000; (j) jute, firm and hemp, \$7,800-981; (k) wood, \$17,500,000; (k) manufactures of wool, \$27,000,000; (i) sllks, \$1,500,000; (iii) pulp and paper, \$58,000; (ii) simdries, \$6,200.

This estimate is on the supposition that the imports of each class of goods would be the same the next fiscal year as it the fiscal year ended last June. But m the imports of wool were three times great in pounds as in 1883, the committee assume that their excessive importation would be largely reduced by the propose bill, although the fact that our domestic production of wool has diminished 8,000.00 production of wool has diminished 8,000000 pounds since 1825 will necessitate the importation of much more wool how than in the latter year. Assuming that the importations of wool will full off at least one-third from those of 1825, on account of anticipation imports to goold duties, we phose the Increased revenue from the piles the Increased revenue from this source at \$11,000,000. Anticipating also that the imports of wools will full off nearly 50 per cent, from the chotmous imports of 1855, we estimate the increased revenue from this source under the proposed (ates at about \$14,000,000. Prop. survay we estimate \$20,000,000 additional revenue. Anticipating a considerable full near the following and the full near the following and the full near the f Anticipating a considerable falling estimates of additional revenue to be de-rived from the tobacco schedule to \$4,000,-The remaining schedules would afbasis of the imports of 1806, but as the would probably be diminished imports a some points, although the gradual restortion of business activity would offthis by increasing the consumption of im-ported luxuries, we reduce the estimate on these to \$31,000,000. Thes would agare gate an additional revenue of \$80,000.0 \$70,000,000 or \$75,000,000 as the probab becaused revenue from this bill the first \$160,000,000 the second year.

ABOVE PROBABLE RESULTS. These estimates are below rather than above the probable result unless a considelay in the enactment of the bishould greatly enlarge the opportunit for imports of articles on which dutie woollens-for speculative purposes. Un-doubtedly any delay beyond the first of would result in a large loss of revenuargols, paintings and statuary, straw or aments, straw mattings, burlaps and arious other articles from the free list of the present law to the dutiable lists duty placed on wool; by raising the duty sugar about three-fourths of per pound in order to encourage the pre duction of sugar in this country, which it Is believed can be done and thus give our farmers a new crop which we now import mainly abroad; by increasing the duty on agricultural productions affected by Canadian competition and on fine cotton some advanced manufactures iron and steel, manufactures of jute, flax

TRON AND STEEL. 'The tron and steel schedule is changed very little from that schedule in the tariff of 184, the change being entirely in the more advanced articles. The same is true of the cotion schedule. In the agricultural, wool and glass and earthware schedules alone are the duties of the act of 1890 fully restored as a rule, and in a few cases increased, with the view of amply protecting and encouraging our farming interests at every possible point. While the duty on clothing wool is larger in proportion to the foreign value than on manufactured articles, yet it is thought desirable for the public interest and for our agriculture that we should I necessary printing done; and then

support that prime necessity for our selves. The duty on early twools, as well as upon many other articles in imposed mainly for revenue. The irritation caused by the use of a few wools hereofore classed as carpet wools, being used for clothing purposes has been remedled by transferring such wools to the clothing wool classes, but the duty on clothing wool has been restored to the rate of the

"In framing this new tariff the aim has the training this new tarm the aim has been to make the duties specific or at least partly specific, so far as possible, to protect the revenue and also protect our own industries. This has been done in response to the wishes of the better class of importers, as well as of the administrators of the law and of our own producers. The very general substitution of specific duties, even where they are only the equivalent of existing ad valorem will of itself increase the revenue and trengthen the protection afforded to our

RECIPROCITY PROVISIONS.

"The reciprocity provisions of the act of 1890 have not only been fully restored, but this policy has been extended by adding to sugar, tea, coffee and hides as articles on which to make reciprocal egreements, such articles as champagne, brandy, wines, artificial and natural min-eral waters, chicle, argols and silk laces. In adding these articles the reciprocity provision is strengthened greatly by pro-viding for a reduction of duties on them countries grently by providing for a

"The bill as a whole has the unanimous support of the Republican members of the ways and means committee, and will, it is hoped, receive the support not only of Republicans but of others who believe that revenue should be at least equal to expenditures, with the conviction that in adjusting daties to secure such rev-ence it is a wise policy to encourage home production and manufactures of our people upon whose parchasing power depends the market for our products."

CHARLES BROWN AWAKES
